

**Steady**  
is the conveying process in both directions as a result of the 21 single-piece, movable aluminium floor profiles, smooth or profiled in thickness of 6 or 10 mm. Ideal for the transportation of various bulk goods such as palette goods, sacks, bales, rolls and recyclable materials.

**Easily accessible**  
and easily maintained: the bulkhead-mounted hydraulic connections.

**The short path**  
Hydraulic connections can be found level with the semitrailer landing gear under the semitrailer.

## S.W 24 Weights and dimensions

|                           |                        |
|---------------------------|------------------------|
| <b>Weights (in kg)</b>    |                        |
| Technical axle load       | 3 x 9,000              |
| Overall weight            | 35,000/39,000          |
| Dead weight               | 7,700                  |
| <b>Dimensions (in mm)</b> |                        |
| Overall length            | 14,000                 |
| Load length (clear)       | 13,532                 |
| Load width (clear)        | 2,470                  |
| Load height (clear) front | 2,660                  |
| Load height (clear) rear  | 2,820                  |
| Loading volume            | 92 m <sup>3</sup>      |
| Overall width             | 2,550                  |
| Overall height empty      | 4,000                  |
| Trailer height loaded     | 1,110                  |
| Trailer height empty      | 1,150                  |
| Wheelbase                 | 7,700                  |
| Tyres                     | 385/65 R 22,5" (6 off) |

All declared weights and dimensions are approximate. The data are for a basic vehicles without taking any possible additionally fitted equipment into account.  
Status: 20.08.2006

**S.W Sliding floor trailer.  
Variable means flexible.**

## Bulk goods out, pallets on the return

### Schmitz Cargobull S.W 24 –

#### This means no more empty loads for you

The S.W 24 sliding floor trailer – practical, effective, flexible.  
The best possible equipment for your business:

- Big savings in time, because the S.W 24 sliding floor trailer has a horizontal loading and unloading system.
- Avoid flexible empty journeys through the transportation of bulk goods of various kinds and pallet goods, sacks, bales, rolls etc. Practical for transport work in the agricultural sector, recycling and the wood industry.
- Light and quick loading through the optional side doors, each with a loading width of 6,515 mm.
- Greater safety at work through secure and controlled loading and unloading with the remote control and thanks to the simple operation of the light and air connections.
- Flexible adjustment to various tractor units with the MRH air suspension.

## The know-how that comes from success

**ROTOS® running gear** – that is the combination of high-quality components from noted manufacturers. EBS, Roll Stability Program (RSP), axle, MRH air suspension, and the hub unit are all perfectly in harmony with each other and are a guarantee for extreme durability.

### Large 430 mm diameter disc brakes

mean a long lifetime for the brake discs and bearings. The best possible ventilation with continuous air circulation makes this possible.

## Bulk goods? Pallets? Different every time

### Also in large volume form if desired

The Schmitz Cargobull S.W 24 sliding floor trailer – now also with 100 m<sup>3</sup> loading volume.

- The 445/45 R 19.5” tyres allow the construction to be higher for more loading space.
- An additional volume of 8 m<sup>3</sup>, or nearly 10 percent, can be achieved using the optimised construction form.
- Better loading thanks to the optimisation of the volume / weight relationship at an empty weight of only 7.9 t.

Schmitz Cargobull S.W 24 – Your sliding floor trailer for variable freight, high loads, more volume.
